

GET \$100 BACK PER 50lb BAG OF FORAGE SEED FROM CPS AND DUCKS UNLIMITED CANADA!

As a producer, you care about your land and the environment. You know that high-quality forage crops are important because they help produce healthy, hefty cattle – and that makes you happy. Forage crops not only provide sustainable grazing sources for livestock, they’re part of sound land management. Forage crops also diversify crop rotations, prevent erosion and retain nutrients.

The 2018 Forage Program helps with the cost of seeding, and includes the extensive line-up of Proven® Seed forage varieties. **Sign up and get your ducks in a row before spring!**

Ask us about our other programs including fencing, wetland restoration and more.

Questions? Call 1-866-252-DUCK (3825), email du_regina@ducks.ca or visit your local CPS retailer.
